

Sprint 3 Report

Team: Diego Garcia, Jacob Katzeff, Justin Tse (SM), Brian Liu

Actions to stop doing:

1. Don't assume self documented code
 - a. COMMENT

Actions to start doing:

2. We all have set times that we set aside for this project
 - a. It is hard to set time to work on top of our classes but this class is a commitment too and should be treated as such
3. We have to have set conventions for how our code should look like
 - a. Modulate, abstract, break up files
4. Abstract code
 - a. The sooner we do this the less pain it will be in the future

Actions to keep doing:

1. Continue scrum meetings
 - a. Update statuses frequently and keep each other on track. The meetings are productive and allow members to offer in-person help to one another as well as exchange ideas.
2. Experiment more with D3
 - a. We need to learn more D3 and understand exactly how we want to display large amounts of data into a compact space
3. Keep a to do list
 - a. Keeping organized and remembering what to do is essential in making progress

Completed/Not Completed

1. As a user I would like to see an aesthetically pleasing opening page (Complete)

- a. Create home page
 - b. Link to California and World Maps
 - c. Link external data files
2. As a sponsor I would like to see abstract and easy to follow code (Not Completed)
 - a. Comment more
 - b. Comment better for more details and specifics
3. As a user I would like to see data visualized in a compact form. (not completed)
 - a. Implement more visualizations
 - b. Optimize for mobile
4. As a user, I'd like to see interesting and meaningful visualizations. (Completed)
 - a. Implement multiple map visualizations (California, World, USA)

Work Completion rate:

- 2 out of 3 user stories completed.
- 6 meetings held over the course of 14 days
- Approximately 10 hours of meetings and team work
- Approximately 20 hours of individual work per person
