Sprint 2 Report

Team: Diego Garcia, Jacob Katzeff, Justin Tse, Brian Liu (SM)

Actions to stop doing:
1. Procrastinating logistical things
   a. They should be done on time to not hinder progress elsewhere
2. Don't assume self documented code
   a. COMMENT

Actions to start doing:
3. We all have set times that we set aside for this project
   a. It is hard to set time to work on top of our classes but this class is a commitment too and should be treated as such
4. We have to have set conventions for how our code should look like
   a. Modulate, abstract, break up files
5. Abstract code
   a. The sooner we do this the less pain it will be in the future

Actions to keep doing:
1. Continue scrum meetings
   a. Update statuses frequently and keep each other on track. The meetings are productive and allow members to offer in-person help to one another as well as exchange ideas.
2. Experiment more with D3
   a. We need to learn more D3 and understand exactly how we want to display large amounts of data into a compact space
3. Keep a to do list
   a. Keeping organized and remembering what to do is essential in making progress

Completed/Not Completed

1. As a user, I want to be able to see my data through a map interface (completed)
   a. Implement California map
   b. Implement a world map
   c. Link maps with external data
2. As a user, I want to be able to input my own data files and parameters and show a data visualization on a map. (not completed)
   a. Add a input file area
   b. Combine any data with the geojson for the map

Work Completion rate:

- 1 out of 2 user stories completed.
- 6 meetings held over the course of 14 days
- Approximately 12 hours of meetings and team work
- Approximately 15 hours of individual work
